SUMMARY

Business and Data Analyst with 8+ years of experience in data analytics, inventory planning, and process optimization. Returning to the workforce after caring for an elderly parent while completing a Master's in Data Science, bringing renewed focus and advanced analytical expertise. Proven success in leveraging Power BI, Salesforce, and Excel to drive data-informed decisions, improve operational efficiency, and support strategic business objectives.

KEY ACHIEVEMENTS

Enhanced Reporting Accuracy

Achieved 25% improvement in reporting accuracy using data modeling techniques for healthcare provider tracking.

Optimized Sales Decision Visualizations

Designed intuitive data visualizations that improved decision-making efficiency by 22% in sales strategies.

Streamlined Inventory Allocation

Developed data models to streamline operational efficiency, improving inventory allocation by 22% across markets.

EXPERIENCE

Provider
[IHSS \(In Home Supportive Service\)](#)

Garden Grove, United States
06/2023 - Present

- IHSS: CA state program offering in-home care for elders, disabled, or low-income, ensuring safe, independent living.
- Enhanced care plan adherence by {20%} by maintaining {500} health records and coordinating with {10} providers
 - Facilitated communication between 10+ healthcare providers, ensuring timely updates and continuity of care across systems
 - Analyzed a simple Excel-based data tracker to identify fluctuations in blood pressure, glucose levels, and appointment adherence—improving physician reporting accuracy by 25%

Business Analyst
[Philip Morris International](#)

Los Angeles, CA
06/2021 - 02/2024

- Leveraged advanced Excel, Power BI, and Python tools to analyze regional sales performance and identify profitability trends across multiple product lines, driving data-informed commercial strategies.
- Collaborated with finance, marketing, and regulatory teams to streamline reporting accuracy and ensure compliance with federal and state requirements, reducing audit discrepancies by 18%.
- Developed performance dashboards and forecasting models that optimized inventory allocation and improved operational efficiency across key distribution markets by 22%.
- Synthesized consumer insights and trade data to support strategic decision-making, leading to targeted promotional campaigns that boosted market share and ROI in competitive categories.

National Account Manager
[British American Tobacco](#)

Los Angeles, CA
07/2014 - 12/2020

- Directed a multimillion-dollar West Coast territory, driving double-digit volume growth by executing data-driven sales strategies across convenience, wholesale, and chain retail partners
- Negotiated regional agreements with key accounts, increasing shelf space by 35% and securing premium placement in over 1,200 high-volume retail locations
- Collaborated with cross-functional trade marketing and regulatory teams to ensure all merchandising initiatives were compliant with federal/state guidelines while maximizing brand visibility
- Identified white space opportunities in underperforming markets, leading to a 22% increase in new account acquisition and strengthening BAT's footprint in California and surrounding states
